

RISE BULLETIN

01 May, 2022

RISE was presented by Dr P.S.Ganguly (PD, RISE) during State Immunization Officers' Review Meeting organized by MoHFW, New Delhi, 25-26 April 2022

What is RISE?

An *innovative, customized capacity building methodology complementing the standard classroom routine immunization training. Its aptitudes include*

- Leveraging technology dissemination amongst healthcare workers
- Updated curriculum, addressing rapidly changing UIP guidelines
- Supportive supervision through real time monitoring
- Flexible to the needs of learners
- Interactive digital self-learning

RISE Application is an extremely innovative and revolutionary platform, which is turning out to be one of the best ways of training methodology. Its quality content, interactive & user-friendly mode, time flexibility and most importantly immediate self-assessment result, is being appreciated by field functionaries.

I am hoping this platform will benefit our field functionaries in enhancing their skills as per their convenience, especially in winters when everything is hampered due to snowfall in our tribal district. Moreover, it will save our resources in terms of time and money to achieve the desired results.

RISE Pilot Phase- A Glimpse

RISE was implemented during March- August 2020 as a pilot in five states of India (Maharashtra, Madhya Pradesh, Odisha, Himachal Pradesh and Tamil Nadu) for capacity building of 2600 health workers. It was rolled out to address the growing needs of large number of healthcare workers due to rapid development in India's immunization program. It was very well accepted by the learners. 100 % course completion was achieved in Madhya Pradesh and Himachal Pradesh, while it was 96% in Odisha and 74% and 68% in Tamil Nadu and Maharashtra respectively.

The pilot phase generated evidence of positive outcomes in establishing the effectiveness of this training model. A definite increase (14%) in knowledge level of the learners who completed the course, was observed during endline assessment as compared to baseline values. The improved knowledge also got translated in improving the practices of health workers during the immunization sessions, as observed during the practice assessment. More than 65% of the learners achieved gold certificate (score more than 85 out of 100) while 34% received silver certificate (score between 70-85 out of 100).
